

Required Movement: nuevas ubicaciones requeridas

$$M_{\text{req}}(R) = \sum_{f \in F_{\text{sci}}(R)} \text{Size}(f) | \text{RequiredLocations}(f, R) \setminus \{\text{Origin}(f, R)\} |$$

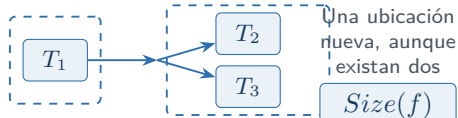

A. Mismo worker

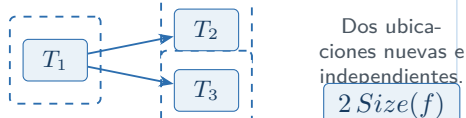

B. Un nuevo worker

C. Dos consumidores, mismo worker

D. Dos workers destino

Se cuenta una copia por **ubicación destino distinta**; no por consumidor ni por salto de staging.
